

AW80033**(Polyurethane-coated Copper Braid Wire, 6 AWG)**

- Mueller's AW80033 is a 6 AWG, extra flexible copper 1050/36 stranded wire which is jacketed at 25 to 30 mil with polyurethane.
- The primary characteristic of the coating is its insensitivity to UV light that can render the jacket opaque, making this cable useful for outdoor use under harsh conditions.
- Material: Wire Copper
 Jacket Polyurethane
